St. Mary's University

HyFlex Courses Defined

Any course that provides simultaneous, live instruction to students in-person (classroom-based) and online (remote location). Courses can be taught both face-to-face and online by the same instructor at the same time, providing students with the opportunity to choose in-person attendance or virtual attendance. In addition, HyFlex courses usually provide an option to complete the course through asynchronous means, thus striving to provide equivalent learning activities in all participation modes.
